

Denys Zagorodny

Product Designer | Reading, UK | +44 7555 850 648 | hello@denyszag.com | linkedin.com/in/denyszagorodny | Portfolio: denyszag.com

Professional Summary

Product Designer with 7 years of experience designing polished, scalable interfaces for B2B and enterprise software, including API security and fintech platforms. Specializes in design systems, accessibility (WCAG), and complex workflow design, with expertise in interaction design and Figma prototyping. Collaborates with product, engineering, and design teams. Proficient in HTML/CSS and AI tools including Claude, ChatGPT, and Figma Make.

Skills

- **UI & Visual Design:** UI Design, Product Design, Visual Design, Interaction Design, Typography, Layout, Prototyping, Wireframing, Design Systems, Component Libraries
- **UX:** UX Design, User Flows, Information Architecture, Complex Workflow Design, End-to-End Design, Usability Principles
- **Tools:** Figma, HTML/CSS, AI-Assisted Design (Claude, ChatGPT)
- **Domains:** B2B SaaS, Enterprise Software, Technical Products, API Security, Fintech
- **Collaboration:** Cross-Functional Collaboration, Product Management, Engineering Handoff, Design Critique
- **Specialized Design Skills:** Accessibility (WCAG), Figma Variables, Mentoring

Professional Experience

Product Designer, Akamai UK (API Security) | 2024 - 2026

- Designed B2B API security UI and end-to-end enterprise workflows for API security products, from wireframes to hi-fi prototypes in Figma
- Contributed components and patterns to the Akamai design system, improving UI consistency across two product areas
- Collaborated with cross-functional teams to raise UX quality and consistency, resulting in fewer support tickets and faster task completion

- Partnered with product and engineering through Akamai's acquisition of Noname Security to align design practices and deliver a unified API security experience

Product Designer, Noname Security (API Security, acquired by Akamai) | 2022 - 2024

- Designed B2B API security UI and experiences across complex technical workflows for security engineers and DevOps teams
- Maintained the product design system, standardizing components and patterns used across the platform

Product Designer, Melio (Fintech) | 2021 - 2022

- Managed design system components and patterns to improve product consistency and scalability across multiple product surfaces
- Designed fintech UI flows for payments and billing with product and engineering, making data-heavy financial workflows clear, scannable, and confident to use, reducing payment errors.

UX/UI Designer, Intuit (Fintech) | 2019 - 2021

- Supported interface design, user flows and product improvements alongside senior designers and cross-functional teams
- Produced UI designs and wireframes for Intuit Quickbooks, contributing to faster task completion and fewer support contacts

Education

Interaction Design Foundation (ixdf.org) | 2020

- Human-Computer Interaction (Certificate)
- User Experience: The Beginner's Guide (Certificate)
